Top Reasons to choose Printix

Universal – flexible – secure – cost-effective

Top reasons to complete your cloud migration with Printix

- **Cloud-based print infrastructure – no print server required:** Eliminate print servers and unnecessary infrastructure. Printix automates the migration process for printer queues and drivers, distributing them efficiently based on departments or locations. This eliminates the need for additional hardware like VPN gateways, reducing management overhead and costs associated with printing, scanning, or copying.

- **Simplified IT management**: With all infrastructure and support in the cloud, you'll experience fewer print related support calls. Self-provisioning tools empower users to access print services easily. Centralized management allows for remote configuration of printers, print queues, and drivers from any location, using any device. Plus, Printix enables automatic addition or removal of print queues based on user location, ID or group memberships.

- **Enhanced Usability and Productivity:** Enjoy intelligent printer discovery and driver selection, and automated print queue setup for enhanced efficiency. Access any printer from any device seamlessly, supporting various operating systems including Windows, MacOS, ChromeOS, iOS, and Android.

- **Robust data security:** Printix prioritizes data security by automatically encrypting documents and ensuring secure printing within your local network. Secure single sign-on options like Microsoft Entra ID, Google Workspace, OKTA, or OneLogin add an extra layer of protection, preventing unauthorized access to printouts.

- **Microsoft Entra ID (formerly Azure) Integration**: Seamlessly integrate Printix with Microsoft Entra ID for a cloud workplace environment with unified single sign-on via Office 365, simplifying and securing user access.

- **Printix for SAP Systems:** Integrate Printix into SAP systems effortlessly with SAP2Printix application, regardless of on-premises or cloud-based setups. Enjoy synchronized devices between Printix and SAP, along with feedback on printing status directly within SAP.

- **Vendor independent:** Manage drivers from different vendors effortlessly with automated queue management. Printix offers flexibility in integrating MFD displays for secure printing and workflow, supporting various vendors and client operating systems, including Windows, MacOS, ChromeOS and Android and iOS for mobile devices.

- **Branch printing:** Extend Printix's comprehensive print management and document security features to branch locations, regardless of size, without the need for additional infrastructure. Native supplier printer drivers ensure full device support, and usage-based pricing makes it cost-effective for even the smallest print sites.

- **Scalability and transparent pricing:** Printix is suitable for any organisation, from five to 500,000 users worldwide. Printix offers a simple scalable annual or monthly subscription by user or device.

- **Next generation capture and workflow:** Capture documents effortlessly from MFDs or mobile devices directly to Printix cloud or other cloud storage solutions. Utilize integrated capture capabilities to scan and deliver documents to various destinations including email, SharePoint or OneDrive, with OmniPage Cloud OCR processing for full-text searchability. OmniPage powerfully and accurately supports ~130 languages and all major PDF versions up to PDF2.0 and PDF A/3u.

Integration options like Cloud Print API and Capture SDK ensure seamless transfer of captured documents to desired destinations, and documents to be seamlessly transferred to a desired destination, e.g. Cloud ERP/ECM.

Printix- 1 month free trial!
